

When Your Website Doesn't Work

Try these steps, in order, before you ask for help.

1  Look for an error in the browser — right-click, **Inspect**, then **Console**.

2  Check every tag has a matching closing tag.

3  Check your file name and file path spelling — including CAPS.

4  Make sure you saved the file, then refresh the browser.

5  Ask a partner to look with fresh eyes.

6  Ask your teacher.
